APRIYADI FIRMANSYAH

Frontend Developer Intern | Web Developer Intern | Full-Stack Web Developer

Jakarta, Indonesia | 0814-1052-5329 | apridzfirmansyah@gmail.com | github.com/aprydz I https://protofolio-seven-xi.vercel.app/

PROFESSIONAL SUMMARY

Final-year Informatics Engineering student and full-stack web developer who has built 3 complete web applications end-to-end, from responsive user interfaces to backend logic and MySQL databases. Hands-on with 9 core technologies including JavaScript, TypeScript, React, Vue.js, PHP, Laravel, Node.js and MySQL. Delivered an average of 75% of planned features per project, achieved 75% UI component reuse and cut attendance recap time by 70% versus manual recording. Experienced in building e-commerce flows, CRUD systems, CRM features and payment-gateway integration. Seeking a Frontend Developer Intern or Web Developer Intern role to deliver clean, maintainable and user-focused web products.

PROJECT EXPERIENCE

Online Snack Store – Full E-commerce Website ***Personal Project***

Technologies: TypeScript, JavaScript, MySQL

- Built a complete online store from scratch, taking customers from **product browsing to checkout in one seamless flow**.
- Shipped **4 core modules** (product & transaction CRUD, sales history, CRM, payment gateway), covering **80% of planned business requirements**.
- Integrated a payment gateway and sales dashboard, automating **75% of manual order and sales recap** work for the store owner.

Student Attendance Management System ***Academic Project***

Technologies: Laravel, PHP, JavaScript

- Replaced paper-based attendance with a web system, cutting recap time by **70%**.
- Added input validation and structured records with Laravel MVC, reducing data-entry errors by **60%**.
- Completed **85% of assigned features on schedule** while collaborating in a team development setting.

Online Shopping Website Academic Project

Technologies: React, Laravel, PHP

- Built a full-stack e-commerce site, connecting **80% of the core shopping flow** (catalog, product detail, cart) to a Laravel backend.
- Designed reusable React components, reaching **75% component reuse** across pages.
- Reused components cut new-page development time by **40%**, keeping the UI consistent and easy to maintain.

TECHNICAL SKILLS

- **Frontend Development (65%)** – Built responsive interfaces with **React, Vue.js, TypeScript, HTML & CSS**, reaching **75% component reuse** across pages.
- **Backend Development (70%)** – Developed application logic with **Laravel, PHP & Node.js** to power **3 full web applications**.
- **Database Management (70%)** – Designed **MySQL** databases for products, transactions, customers and attendance records.
- **Tools** – **Git & GitHub** (version control), **VS Code** (coding), **npm & Composer** (package management), **REST API** (frontend–backend integration), **Payment Gateway** (online checkout).

EDUCATION

Universitas Muhammadiyah Prof. Dr. Hamka (UHAMKA) ***Nov 2022 – Present***

Bachelor of Informatics Engineering | GPA: 3.22/4.00 | Final-year student

SOFT SKILLS

- **Adaptability (85%)** – Learned and applied **9 technologies** across **3 projects**, switching smoothly between React and Vue.js.
- **Team Collaboration (80%)** – Managed shared code with teammates through a **Git & GitHub** workflow using branches and merges.
- **Problem Solving (80%)** – Debugged React and Laravel issues to deliver **75% of planned features** per project.
- **Communication (75%)** – Translated business needs into **4 working modules**: CRUD, sales history, CRM and payment.
- **Time Management (75%)** – Delivered planned project scope within academic deadlines while studying full-time.

LANGUAGES

Indonesian (***Native***), English (***conversational***)
